If necessary, they are prepared to withdraw from the conference without signing the protocol. You can depend upon the full moral support of the people at home.

Every year Mr. Fisher makes shipments of Tipton county sheep. He stated here recently that the number of sheep herds over the county is increasing with rapidity. He stated that many sheep raisers are saving their ewes for next year's flock instead of selling them as has been the custom in former years. It is believed that with the passage of a good dog law sheep raising will soon become a prominent industry in the county.

Would Have Congress Fix Rate of Return by Districts. Excess to Go to Government for Public Purposes.

ST. LOUIS, Mo., May 14.—Compulsory federal incorporation of railroads, government guarantee of income and the removal of the roads from the jurisdiction of the present state commissions are steps proposed prior to the return of the railroads to public ownership, were condemned by Elihu Root in a letter read today before the Missouri bankers' association in session here. Mr. Root's letter was read by Mr. J. H. Warfield, president of the National Association of Railroad Securities, who had requested an opinion from Mr. Root as advisory counsel to the association.

As an alternative Mr. Root unqualifiedly endorsed the plan put forward by the security association, in which Congress would fix a fair rate of return for the railroads of each state-making difference in the rate-making authorities to fix rates which would presumptively yield that return. In the event of any road making more than the prescribed rate, the excess would be taken by the government and used to promote public interest in transportation.

A general rate fixed by the government for all railroads, Mr. Root contends, has the defect that if the rate is fixed so as to give a fair return to the road, it will give an excessive return to the stronger roads, while if the rate is fixed on the basis of an equitable return to the strong roads it would drive out of business their weaker competitors.

All Conditions Impossible.

Mr. Root recedes his conclusion with the statement that "it is apparent that the people of the country do not wish to enter upon a permanent system of government operation. The railroads are to be returned to private ownership," he said, "and they can not be permitted to go into a controlled operation of the earlier period."

He maintains also that some provision must be made to prevent the continuance of the steady progress toward bankruptcy, which characterized the roads before government takeover, and which he pointed out that half the people of the United States are interested in the railroads. The \$17,000,000,000 of securities representing the railroad investment of the country and that one-quarter of the savings of 50,000,000 people holding policies in the great life insurance companies is invested through these companies in railroad securities.

"That, however," he continues, "is only a small part of the reason for the argument which will maintain the value of these securities. Railroad securities are a chief basis of credit which is used to raise money for the country and if that credit be destroyed the consequences to all American property will be incalculably disastrous."

In regard to federal incorporation, Mr. Root says:

State Commissions Needed.

"There is only one avowed purpose which could be accomplished by this plan, and that is to withdraw the roads entirely from the jurisdiction of the state commissions. This is unnecessary because the federal government can authorize the federal rate making authorities to override the state commissions which are to be destroyed."

The proposal for a government guarantee, which the government must make the guarantee good there would be neither opportunity nor incentive for the roads to make any improvement in the operation of the railroads. The government plan, he said, "gives them their right to work for it or not. This is fatal to enterprises and efficiency."

In commenting on Mr. Root's letter Mr. Warfield said:

"The danger that confronts the country is not that there is a sentiment against the railroads, but that there is a sentiment in favor of government control and operation, but that in the multiplicity of plans that have been suggested for the relief of the railroads, legislation may fall together at the special session of Congress, and government ownership may be forced upon us because of nonaction. If they are returned without adequate legislation financial chaos will result."

HUNGARIAN GOVERNMENT IS BECOMING STRONGER

VIENNA, May 14. (By the Associated Press.)—Reports from Budapest say that the position of the Hungarian government is becoming stronger in the last few days.

The hall of the Hungarian advance has been cleared of the communists, who believe that the Hungarians undertook more than they were able to accomplish.

Because there is no cloth factory in operation, the Hungarian government has ordered a few leaders of the international revolutionary movement who are sincere. In the country-wide campaign this party now is carrying on, the men of the better classes, the disposition of the people, and the moral standard constitute the greatest handicap in the way of aiding the Hungarians.

Significant in the present situation is the development of a community party, which is a few leaders of the international revolutionary movement who are sincere. POWDER IN SHOES AS WELL AS GUNS

Foot-Ease to be Added to Equipment of Hospital Corps at Fort Wayne.

Under the above heading the Detroit Free Press, among other things says: "The theory is that soldiers whose feet are in good condition can walk further and faster than soldiers who have corns and bunions lacerated in battle."

There is no foot comforter equal to Allen's Foot-Ease. It is a healing powder to be shaken into the shoes and sprinkled in the foot-bath, for hot, tired, aching, perspiring, smarting, swollen, tender feet, corns, bunions, blisters or callouses. Cocoon Oil Makes A Splendid Shampoo

If you want to keep your hair in good condition, be careful what you wash it with.

Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Multiscent coconut oil shampoo (which is pure and entirely greaseless), is much better than anything else you can use for shampooing, as this can't possibly injure the hair.

Simply moisten your hair with water and rub it in. One or two teaspoonfuls will make an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily and removes every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly and it leaves it fine and silky, bright, fluffy and easy to manage.

Shivar is very cheap, and a few ounces is enough to last everyone in the family for months.
